#TheCoyoteIs

*The Coyote is limited,
as Bugs is limited, by his anatomy.*
(Chuck Jones)

:-)

Here some more about Chuck Jones,
Roadrunner and Wile E. Coyote:
The rules of Road Runner and
Wile E. Coyote cartoons.

And here [even more!](#)

Architecture, like any other discipline
is about communication,
narrative, storytelling.

What are the tacit (or explicit) rules
of your space-based stories?

Now, back to business...

Architecture 101 [Part 3](#) starts
on Monday April 27, 2015.

Here we are with our third and last
part of our course on architecture.

Did you complete Parts [1](#) and [2](#)?

We started from pure nothingness,
made our way through a couple of places
(and the general idea of “place”), and
finally put ourselves into “space”.

Now in part 3, we will spend 2 full weeks immersed into “space”, then another 2 weeks going from space to architecture, and finally, 2 full weeks into architecture.

Six weeks of online lessons, one week of exams and we will be done with Part 3 and the “online” piece of Architecture 101.

Then, we will fly to Germany to build very “real” stuff in the woods.

Are you joining us for our summer camp?

If you feel like it, you will find all the information you need to know [here](#).

We sure hope to meet you there in real life!

Are you ready?

Btw, if you did not follow Parts [1](#) and [2](#),
you can still participate to [Part 3](#).

Of course, we think it is better to do things in the right order, starting from 1 (or from 0)... But we “shaped” our course in a way that newcomers don’t feel too much “lost”.

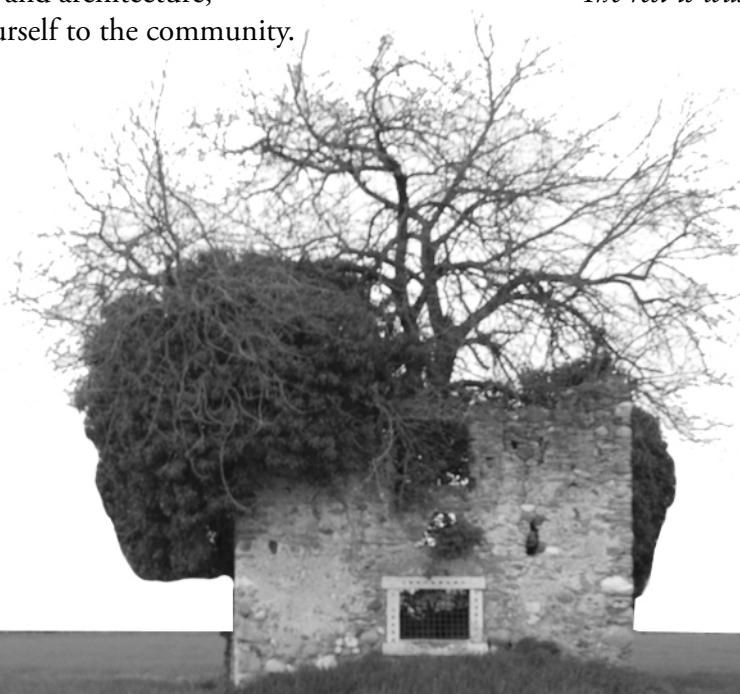

If you are new to the whole Architecture 101 journey and to these concepts of nothingness and place and space and architecture, please introduce yourself to the community.

We’re all here
to give you a hand.

You can join our [Facebook Arena](#) and [Facebook page](#), our main [Instagram](#) account (search for the #Architecture101 hashtag!), our [Twitter](#) or [Google+](#)...

As Joseph Beuys would say:
*To be a teacher is my greatest work of art.
The rest is waste product, a demonstration.*

:)

An introduction to space and architecture

What is Architecture 101?

Architecture 101 is an introduction to space and architecture.

A six-month journey consisting of 3 online courses open to all on iversity ([part 1](#), [part 2](#), [part 3](#)), one final exhibition (or graduation party) and a week-long [summer camp](#) “offline”.

Architecture 101 is also a community of people.

People who like to learn and make things together.

A big community of special people that started taking shape with [Design 101](#) and that keeps on growing with Architecture 101.

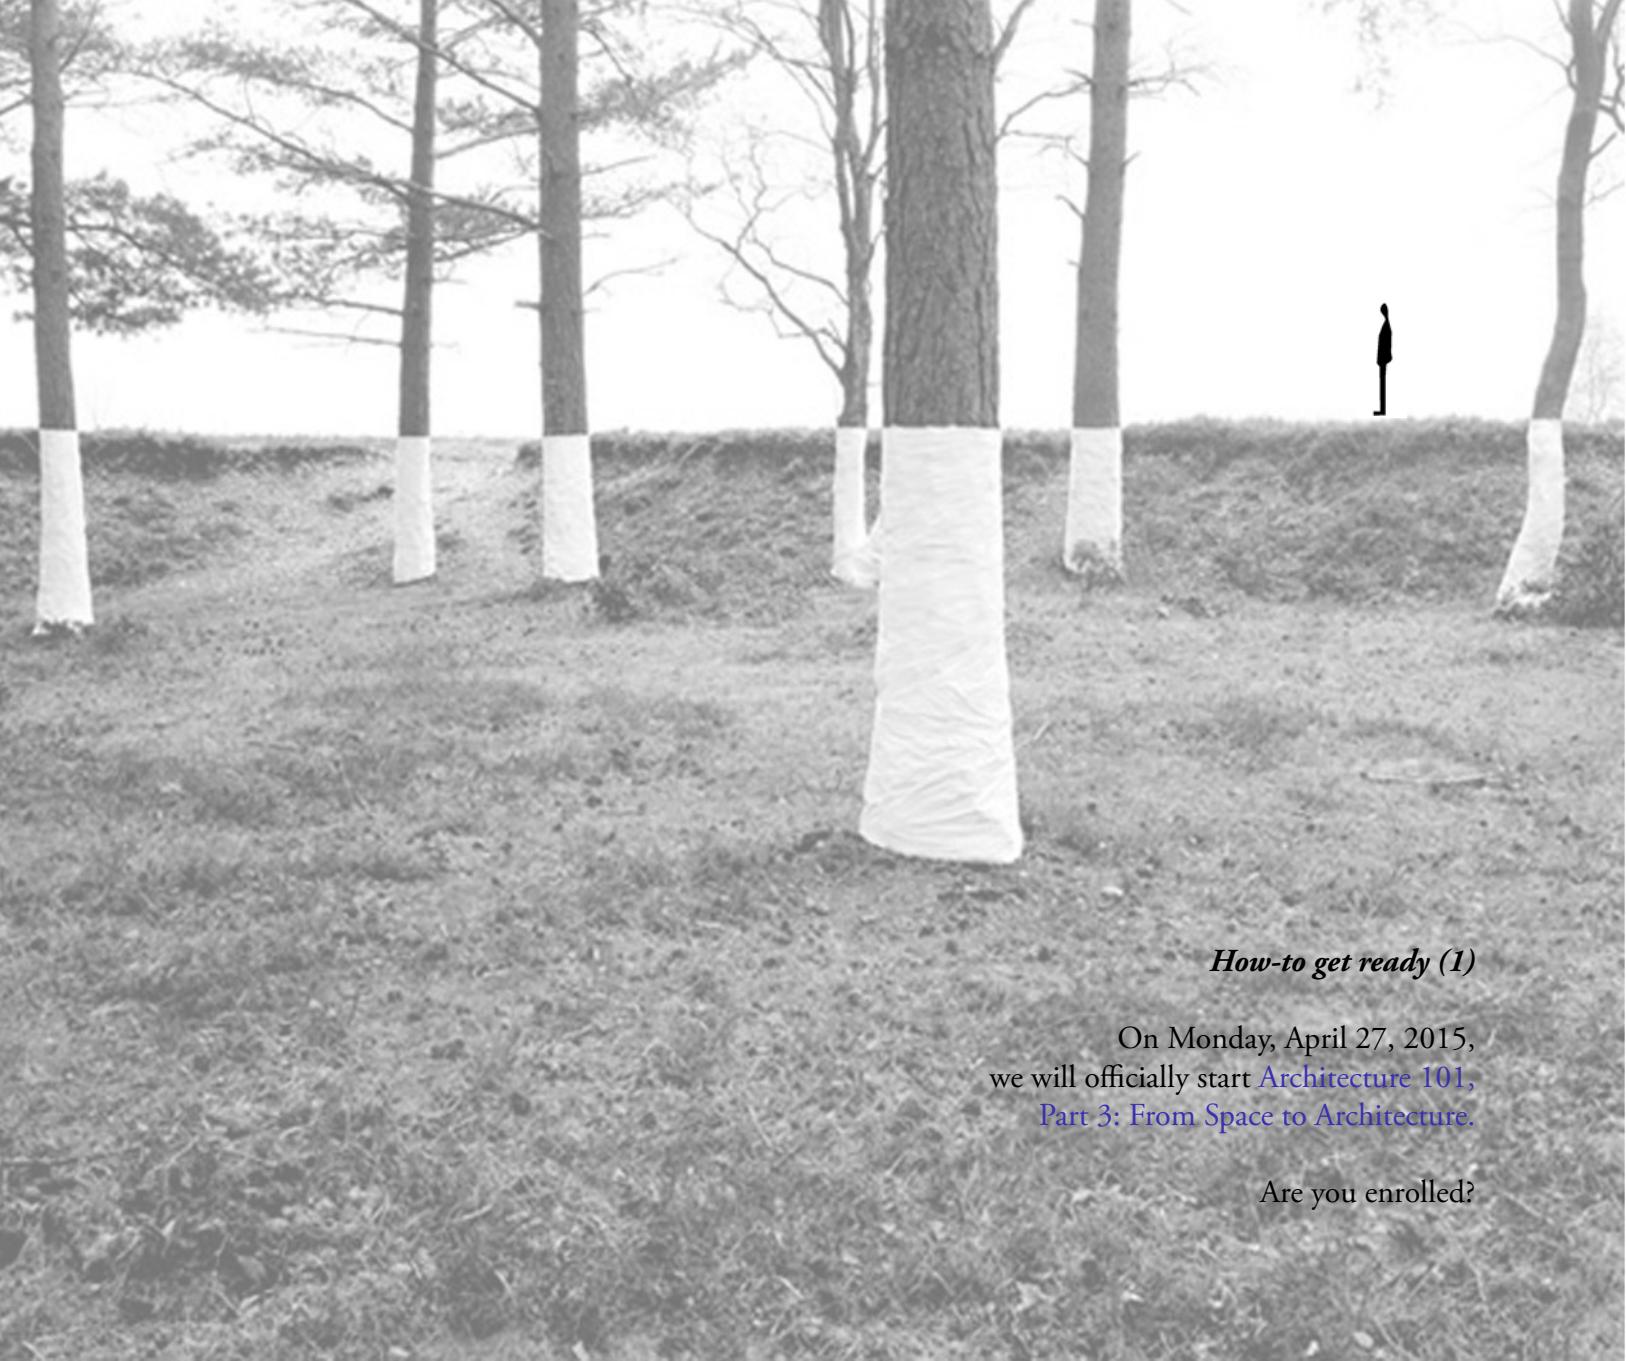

In fact, one of the most fascinating things about Architecture 101 is that it is a MOOC run by a community of people.

Some students from Design 101 (and new ones as well) joined our team and are now managing the whole thing by themselves.

We (the teachers), produce the didactic material.

The rest (the biggest and most terrifying part of this MOOC) is run by this community called “Design 101 Cells”.

How-to get ready (1)

On Monday, April 27, 2015,
we will officially start [Architecture 101,](#)
[Part 3: From Space to Architecture.](#)

Are you enrolled?

How-to get ready (2)

We shaped this course's exercises for a very specific kind of student: one who owns a smartphone (and/or tablet) and who has an [Instagram](#) account.

Of course you can follow us via a desktop computer, make homework at home on your table.

Yet, the way we intended the whole thing is for someone who follows the course (including doing homework) via a smartphone (or tablet) and who posts them to Instagram (and communicates with the community using social media).

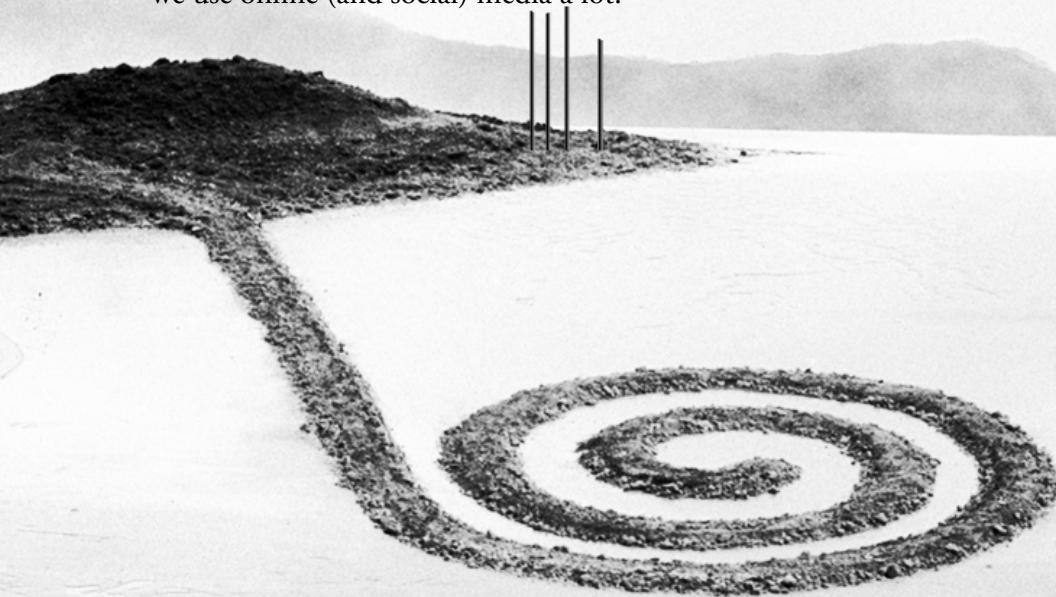

:-)

How-to get ready (3)

As we said above, Architecture 101 is also a community of people making things together. People from all parts (and timezones) of the world.

In order to keep our community alive, we need to communicate with each other using words and images. To do so, we use online (and social) media a lot.

Do you have [Instagram](#)?

In Architecture 101, it is the social media we use the most.

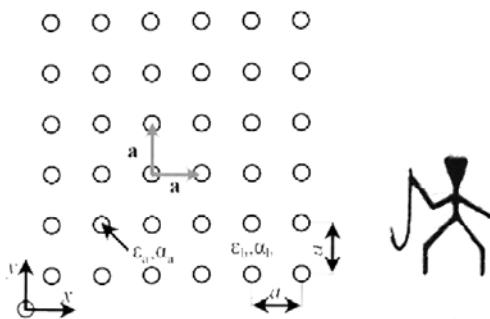

We use it to spread / gather / visualize what we do.

Architecture 101 also uses other social media for various sorts of communications.

Here you can find the course's official accounts: [Instagram](#), [Facebook](#), [Facebook Arena](#) (our Facebook group), [Twitter](#), [YouTube](#) and [Google+](#).

By the way,
these are our (instructors) accounts:

Stefano on [Facebook](#), [Twitter](#) and [Instagram](#)
Anne-Sophie on [Facebook](#), [Twitter](#) and [Instagram](#).

Then, there is also Giulia Camedda (on [Facebook](#) and [Instagram](#)) who is working with us on various levels and Claudia Garrone (on [Facebook](#) and [Instagram](#)) who is in charge of our daily videos.

Let's follow each other!

:-)

How-to get ready (4)

How exactly does the whole thing work?

Every day, from Monday to Friday, for a total of 6 weeks, we will send you an email with a short video to watch (to get you in a certain mood), and a pdf containing the brief to an assignment (and a series of references to learn more on the subject at hand).

Then, you will make your assignment.

Once you are done, you will post it to Instagram and check what the others made (via a daily hashtag).

To make and share and give and take, this is the best part of the Architecture 101 journey!

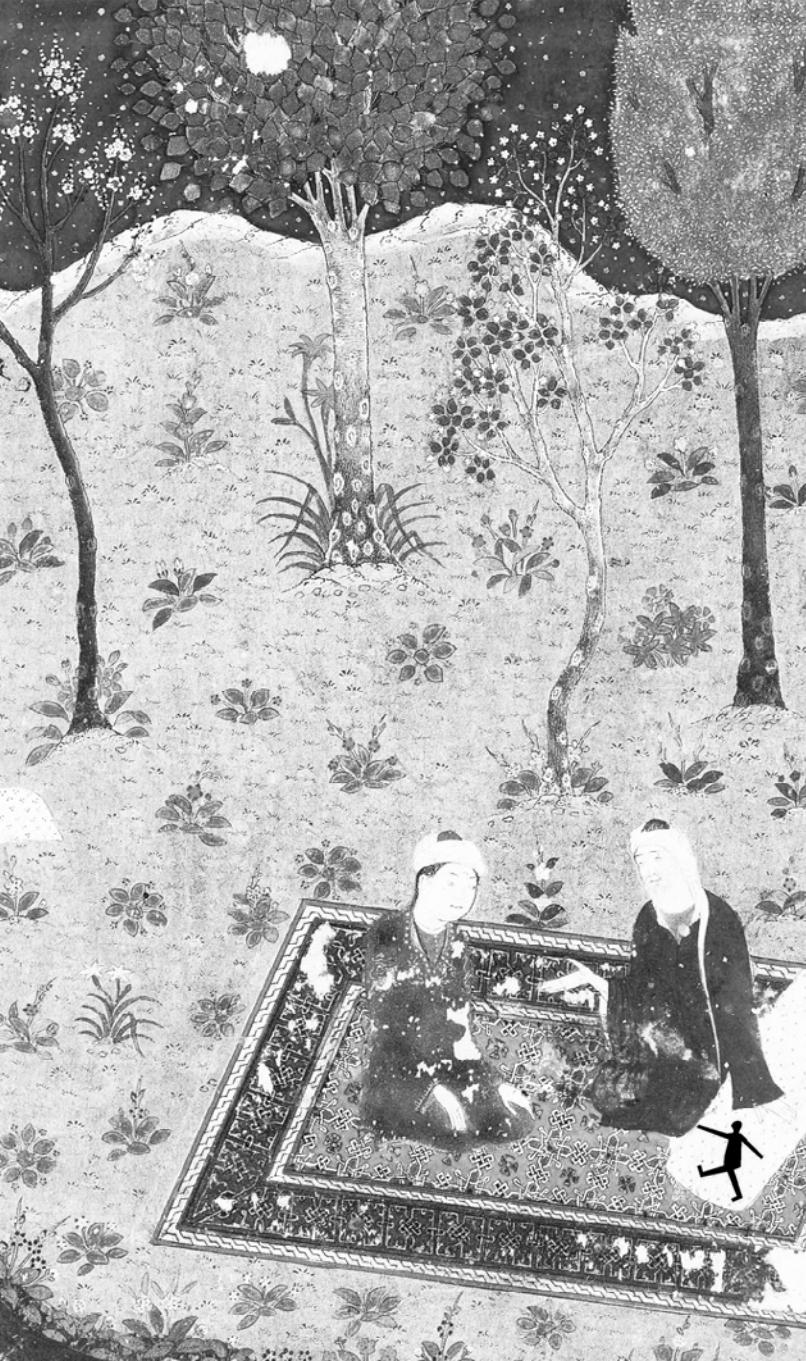

During the weekend, we will give you some time to relax & catch up.

Once a week, you will upload the 5 exercises you made during the week to the iversity platform, in the special peer-to-peer homework section.

Once this is done, your homework will be sent to 7 other students who will need to evaluate it (according to some given criterias).

In this process, you will also receive 7 bundles to grade.

:)

Important thing to know (1)

By posting your homework pictures on instagram, you agree that our team might “repost” them to the course account, share them on twitter or facebook and add them to the course encyclopedia (always giving you the credits, of course).

Important thing to know (2)

Posting your work to Instagram is essential for keeping us (the Architecture 101 community) alive, healthy, charged with energy and vivacity.

In a different way, posting your work to Instagram is essential to make the overall experience fun and cool.

However, in order to correctly and officially follow the course, we would like you to participate in at least 3 of the 6 peer-to-peer sessions on the iversity platform (as we explained previously) to get peer-evaluated and evaluate your peers.

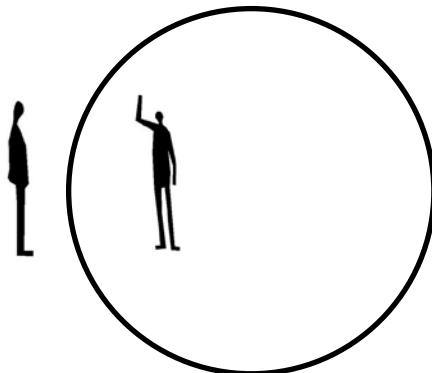

Understood?
:-)

Important thing to know (3)

And now, once again,
the last but not least most important thing
to know about Architecture 101:

Architecture 101 is (very) cool because it
is run by our community of “Design 101
cells” (autonomous units in charge of one
main social media or activity).

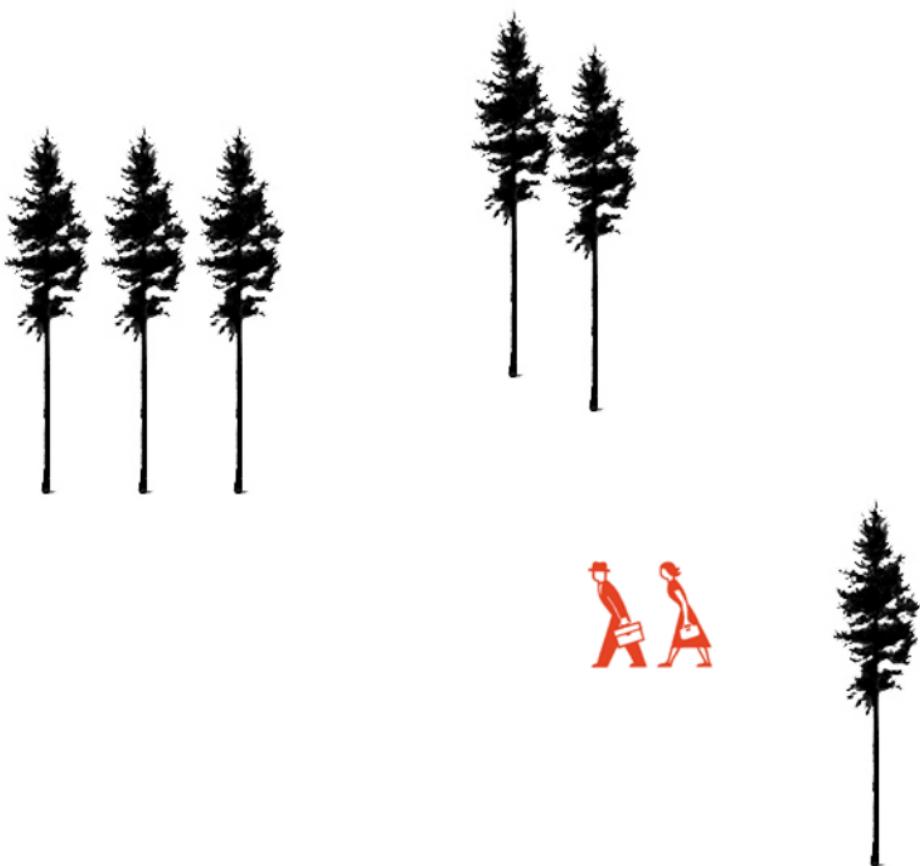

To learn more about their various activities,
the cells wrote you a very nice letter.
[Here, the link to it.](#)

Thanks to (in a somehow random order):

Filip Goc, Claire Bolsens, Milena Lozada,
Anna Amalfi, Katy Carter, Karen Lili,
